

# ENVIRONMENTAL POLICY

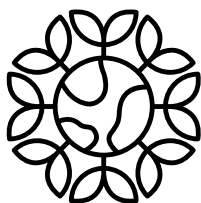

The company Ramax Engineering d.o.o. by manufacturing tools for plastic injection molding, injection molding of plastic products and assembling assemblies, contributes significantly to the reduction of environmental impacts on a global level with its vision.

Demands for rapid changes, sustainable operations, reduction of the carbon footprint and efficient use of energy, the company strategically directs towards the digital transformation of processes, the efficient use of natural energy resources and the consistent implementation of innovations in the field of the environment.

The environmental management system, certified by ISO 14001, was introduced with the aim of continuous improvement of environmental performance. The company achieves the goals set within the framework of the EMS and the requirements of customers and stakeholders through a commitment to the following values:

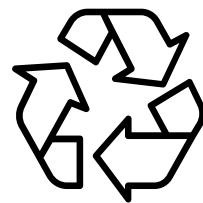

CONSUMPTION  
MANAGEMENT

MAINTAINING  
DIVERSITY

SAVING  
RESOURCES

WASTE  
SEPARATION

*" All company employees and external contractors are responsible for implementing relevant environmental legislative requirements, for preventing pollution and for reducing our impact on the environment. Together with the other members of the management, we are committed to the responsible implementation of this policy and encouraging employees to continuously improve practices in the field of environmental protection. "*

Emil Martinšek and Branko Ramšak,
